Pioneer Coding Club 2024-2025

(5th and 4th grade)

==Sign up will be open September 11th-18th==

(Google form will only be open during these dates)

Pioneer Coding Club allows students the opportunity to learn coding skills and build projects using a program called Scratch. Between September 11th-18th, students can apply for the program by filling out this Google form.

A max of 24 students can participate due to the amount of equipment and space available. We will begin filling slots with 5th grade students that have not participated previously, then 4th grade students. Our goal is for any interested students to participate one time during their 4th or 5th grade year as the instructional material is the same each year. You will be notified if your child has been accepted or not via email by Friday, September 20th.

Please review the club dates below to make sure your child is available before filling out the application. Students with 2 or more unexcused absences will be dropped from the club to allow for another student to participate.

2024-25 Pioneer Coding Club dates are 3:15-4:15pm on Tuesdays:
- October 1 & 8
- November 12
- December 3
- January 7 & 14
- February 4 & 11

Sincerely,

Mrs. Dawn Austin
