

# Pioneer Robotics Club 2024-25

(5th and 4th grade)

**Sign up will be open September 11th-18th**

(Google form will only be open during these dates)

Pioneer Robotics Club revolves around learning the basics of robotics and building a robot using VEX IQ robotics kits. Between September 11th-18th, students can apply for the program by filling out this [Google form](#).

A max of 24 students can participate due to the amount of kits available. We will begin filling slots with 5th grade students that have not participated previously, then 4th grade students. Our goal is for any interested students to participate one time during their 4th or 5th grade year as the instructional material is the same each year. You will be notified if your child has been accepted or not via email by Friday, September 20th.

**Please review the club dates below to make sure your child is available before signing them up.** Students with 2 or more unexcused absences will be dropped from the club to allow for another student to participate.

**2024-25 Pioneer Robotics Club dates are 3:15-4:15 pm on Thursdays:**

- October 10
- November 14
- December 5
- January 9
- February 13
- March 6

Sincerely,

**Mrs. Dawn Austin**
